

Ultra-pure Nucleotides

Clearly the best

- **High-quality:** at least 99 % purity, ideal for use in PCR, qPCR and NGS applications
- **Optimum performance:** guaranteed free from PCR inhibitors for maximum assay performance
- **Convenient:** Ready-to-use sequenceable grade dNTPs, sets or pre-blended dNTP mixes
- **Enzyme free:** DNase, RNase and Nickase free
- **Flexible:** available in custom, bulk and OEM quantities
- **Stable:** extended shelf-life of 24 months at -20 °C

HIGH PURITY

Meridian ultra-high purity deoxynucleoside triphosphates (dNTPs) are manufactured to the highest standard in the industry. Our dNTPs are enzymatically synthesized from premium quality raw materials in state-of-the-art production facilities. The manufacturing process eliminates impurities and PCR-specific inhibitors such as modified nucleotides, tetraphosphates and pyrophosphates commonly observed in other commercially available dNTP products. Our dNTPs undergo stringent purification steps as determined by quantitative HPLC and possess 99 % purity to enhance incorporation and yield optimal results.

Fig. 1 Exceptional sensitivity in One-Step RT-PCR

Varying concentrations of mouse total RNA (30 ng to 3 pg) in duplicate was used for highly sensitive first-strand cDNA synthesis and PCR in a single tube with MyTaq™ One-Step RT-PCR Kit (BIO-65048). PCR primers specific to *RN18S* was used to produce a 1 kb fragment. The results illustrate that using Meridian dNTPs, RT-PCR was successful even with very low template concentrations.

APPLICATIONS

Meridian ultra-pure dNTPs have been extensively tested and validated for use in a wide variety of molecular biology applications including highly sensitive techniques such as cDNA synthesis, RT-PCR (Fig. 1), long-range PCR (>20 kb), qPCR (Fig. 2) and low-copy number assays as well as DNA sequencing and microarrays.

Purity (HPLC)	> 99%				
DNase, RNase, Nicking Activity	Negative				
Stability	≥ 24 months				

Fig. 2 Superior qPCR results

Meridian dNTP mix is formulated for optimal performance in qPCR applications, the most sensitive technique for gene expression analysis, as it is dependent upon high quality reagents to generate reliable data. Human β -actin gene was amplified using SensiFAST™ SYBR Lo-ROX One-Step (red) and the results compared with those from a One-Step Kit from supplier A (green). The experiment used 10-fold serial dilutions of human RNA (in triplicate) over 5 orders of magnitude. The results illustrate that Meridian dNTPs are ideal for highly sensitive, reproducible and specific qPCR even with very low template concentrations.

QUALITY CONTROL

Meridian dNTPs are tested for the absence of DNase, RNase, Protease, Nickase activity and the absence of human, viral and bacterial DNA. Each batch is purified with quantitative HPLC and undergoes stringent functional tests with a wide range of assays to guarantee performance and outstanding results.

EXCELLENCE IN PRODUCTION

Meridian is an ISO 13485 certified primary manufacturer of nucleotides. Our purpose-built facility is dedicated to the development and production of superior quality dNTPs and has the capacity for small scale to industrial scale production in a wide range of formats and arrangements.

CREATIVE SOLUTIONS

We specialize in customized solutions to meet your specific nucleotide needs, from micro-liter to multi-liter quantities, to special mixes, blends and concentrations.

In our lab we only use dNTP mix from Meridian for our PCR and real-time PCR master mixtures. The quality is second to none!
